PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on project experience in machine learning, computer vision, Generative AI (RAG, LLM applications), and full-stack Python development. Built and deployed an AI-powered voice assistant integrating conversational AI, facial recognition, and IoT automation under a KSCST-funded research grant. Skilled in Python, TensorFlow/PyTorch, LangChain, and Flask, with a track record of turning ML concepts into working end-to-end applications. Seeking an entry-level AI/ML Engineer role to apply this foundation to production-grade AI solutions.

EDUCATION

AMC Engineering College Bachelor of Engineering — Artificial Intelligence and Machine Learning; CGPA: 8.45/10	Bengaluru, India 2022 – 2026
RV Higher Secondary School 12th Grade – 89.5% 10th Grade – 97%	Narippalli, Tamil Nadu 2022 2020

EXPERIENCE

Machine Learning Intern, Unified Mentor - Built and evaluated supervised and unsupervised ML models (regression, classification, clustering) on real-world datasets using Scikit-learn and Pandas - Performed end-to-end data preprocessing and exploratory data analysis, improving model input quality and reliability - Applied ML techniques to solve practical business problems, translating raw datasets into actionable insights	Sep – Dec 2025
Android App Development Intern, Vayu Aarambh Innovation Pvt Ltd - Developed an Air Quality Index (AQI) monitoring app in Flutter/Dart, pulling live air quality data via the OpenAQ API - Built interactive charts and graphs to visualize real-time AQI trends, improving data readability for end users - Collaborated with a team on UI/UX design and app architecture using modern Flutter development practices	Dec 2025 – Feb 2026
Python Full Stack Trainee, Besant Technologies - Built a Vehicle Rental Management System for small-scale industry use, with Flask backend and MySQL database - Designed and implemented REST APIs to handle booking, inventory, and rental transaction logic - Integrated front-end and back-end components to deliver a functional, end-to-end web application	Feb – May 2026

PROJECTS

Voxmate – Advanced AI Voice Assistant (GitHub Repo) - Built an AI-powered voice assistant with conversational AI, facial authentication, and IoT-based smart device control - Designed a modular architecture supporting 10+ voice command categories; integrated MQTT for real-time home automation Tech: Python, PyTorch, OpenCV, MQTT, Flask	Team lead KSCST Funded Ref No: 49S_BE_3509
PDF RAG Chatbot (GitHub Repo) - Built a Retrieval-Augmented Generation (RAG) chatbot for intelligent PDF document question answering - Implemented text chunking, embeddings, and semantic search with FAISS, paired with LLM-powered context-aware response generation Tech: Python, LangChain, OpenAI, FAISS	Personal Project
The Ledger - AI-Powered CSV Data Q&A Agent (GitHub Repo) (Live Deploy) - Built an AI-powered data analysis agent that allows users to upload CSV datasets and query them using natural language - Implemented a Natural Language → SQL → Query Execution → Natural Language Answer pipeline using Google Gemini and SQL.js - Developed dynamic schema detection, read-only SQL execution, CSV upload, and real-time query result visualization Tech: React, Vite, Node.js, Express.js, Google Gemini, SQL.js	Full Stack - AI Project

SKILLS

- Languages:** Python, SQL, C, Dart
- AI/ML Frameworks:** Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, NLTK
- Generative AI:** RAG, LangChain, Vector Databases (FAISS), Embeddings, LLM Applications, Hugging Face
- Core ML/DL Concepts:** Supervised & Unsupervised Learning, Neural Networks, CNNs, NLP, Computer Vision
- Data Analysis:** Pandas, NumPy, Matplotlib
- Databases:** MySQL, SQLite, MongoDB
- Web & APIs:** Flask, FastAPI, REST APIs
- Mobile:** Flutter, Dart, Android UI/UX
- Tools & Platforms:** Git, GitHub, Docker (basics), Jupyter Notebook, VS Code, Power BI, AWS, Windows, Linux
- Soft Skills:** Communication, Leadership, Problem-Solving, Teamwork, Adaptability

CERTIFICATIONS

- Crash Course on Python — Google (Aug 2025)
- Machine Learning with Python — IBM via Coursera (Sep 2025)
- Programming in Python — Meta via Coursera (Oct 2025)
- Introduction to Retrieval Augmented Generation (RAG) — Duke University via Coursera (Aug 2025)
- AWS Academy Graduate — Machine Learning Fundamentals — AWS Skill Builder (2025)
